Medical Service Billing For Pharmacies

TransactRx can assist your pharmacy with claims submission and payment reconciliation for all types of services covered by a patient's medical benefits.

If you have a contract with a Medicare, Medicaid or Commercial payer to be reimbursed for medical services such as vaccines or smoking cessation counseling we can get your claims submitted, payments posted and outstanding claim issues resolved.

Grow Your Pharmacy's Profits With Medical Service Billing

Don't let claims processing complexities keep your business from growing. Contact TransactRx today.

Changing The Way That Pharmacies Bill For Vaccines

Use your existing pharmacy software or our web-based software to submit claims and manage reimbursement for flu, pneumonia and all other adult and pediatric vaccines. Submit claims to Medicare Part B, Medicaid and Commercial Payers. Our systems work the same way you work now.

Claims are submitted in standard NCPDP D.0 format through your current switch to our innovative clearinghouse that in real time checks the medical benefit eligibility of the patient and then converts the claim to an ANSI X12 837 professional medical claim that is forwarded to the patient's insurance plan through the appropriate medical claims clearinghouse.

Hands Off Claim Management

- No Coding Knowledge Required
- NDC Codes are Translated to appropriate CPT or HCPC codes
- Appropriate payer specific diagnosis codes are applied at the clearinghouse
- We Bill, Post electronic ERA files and followup on denied or rejected claims on your behalf.

Maximize Your Profits

Using TransactRx to manage your vaccine billing will insure you are not missing any potential profits due to improper coding, missing information or under billing.

- Claims submitted through TransactRx have a payment rate near 100%.
- Claims are checked against fee schedules to avoid under-billing
- All claims are checked for patient eligibility in real time and claims are rejected with appropriate information such as different primary payer.
- All claims are checked against payer specific edits in real time to minimize delayed payments or denied claims.
